Experience

Freelance Web Developer & Designer | Self-Employed | 2023 – Present

- Design and develop modern, responsive websites and landing pages tailored for business conversion.
- Manage the full application lifecycle, from database schema planning in Supabase to final deployment and maintenance.
- Configure secure hosting environments and optimize site performance for speed and accessibility.
- Consult with clients to translate business requirements into functional technical specifications.

Education

University of Nairobi | BSc. Food Science & Technology | Expected 2027

- Leveraging analytical and technical skills from a top-tier research institution to solve complex software problems.

Certifications & Self-Learning

Full-Stack Web Development: W3Schools & MDN Web Docs
UI/UX Design & Frontend Frameworks: FreeCodeCamp & Coursera

Leadership & Social Work

Chairperson | Campus Christian Union, University of Nairobi

- Lead an executive committee and manage communication for a large membership body via digital platforms.
- Coordinate community outreach programs and social welfare initiatives, demonstrating high-level organizational discipline.

Projects

Vine Tracker: A custom tracking application with push notification integration using VAPID keys and Supabase.

Business Growth Landing Pages: Developed high-conversion marketing sites with integrated SEO and performance tracking.
